

Lojer Field Operating Table

Tested by civilian and military field hospitals all around the world

Lojer Field Operating Table has been developed in close cooperation with the Red Cross and military medical experts, and it has been used in civilian and military field hospitals all around the world. The table also has Nato-coding.

Field Operating Table is manufactured from high quality raw materials. The metal frame is made of epoxy-coated steel and table top is made of waterproof plywood board. Table is fully mechanical; all the functions are manually operated, nevertheless providing sufficient number of features to execute efficient field operations. The table also features 10 x 25 mm siderails for accessories. Installation and operation are extremely easy and when the table is not in use it can be folded to save space.

The entire table is designed to fit into a carrying box measuring 78 x 38 x 41 cm (= 0,12 m³), and the table weight approx. 65 kg. The aluminium carrying box is built for rough conditions and is dimensioned according to the Red Cross standards. The mattress is 50 mm thick, size 190 x 50 cm (in four sections) and all the other accessories can be packed in a similar carrying box.

Ready for field operations in just few minutes.
